HARRISON STANDS BY BURKE.

Serious Split in Ranks of the Chicago

A dispatch from Chicago yesterday says: Mayor Harrison openly severed relations with City Clerk Loeffler today, and at the same time set at rest all rumors of a quarrel between himself and Robert E. Burke by declaring that Burke was his friend. This, coming fast upon the lockout yesterday of Thomas Gahan and some seventy delegates from the meeting of the county central democratic committee, is taken to indicate the mayor's enmity for the faction led by ex-Mayor John P. Hopkins, with which Loeffler is affiliated. The mayor, however, denounced the tactics of the Burke faction, and said it was "the poorest kind of management" to bar Gahan and his followers from the meeting.

Special stress is laid upon the mayor's announcement that he and Loeffler had come to the "parting of the ways," since patched up difficulties. Mr. Loeffler said today that the fight would be taken to the state committee, which is controlled by Hopkins, and from there to the county

Benefit of Florence Crittenton Home. of music and elecution, at the Florence Crittenton home, 218 3d street, last evening, was well attended, notwithstanding the unfavorable weather. Music was furnished by the Depew Orchestra and Mr. Clarence Beatty, with violin selections by Professor Reukert. There were several solos and recitations. The managers will repeat the pro-

gram this evening.

Court Enjoins Bishop Bonacum. In the district court at Seward, Neb., yseterday Judge Sornberger passed on the litigation between Bishop Bonacum of the Catholic see of Lincoln and Priest William Murphy. The court's decision is in favor of Father Murphy in so far as it relates to the parish property in Seward and Ulysses. Judge Sornberger sustained the contention of counsel for Father Murphy by enjoining the bishop from bringing any action by the authorities at Rome in accordance with the canonical law of the church. The court also quieted title to the church property in the two towns in favor of the parishioners.

MOST MODERN TYPE

Group of Buildings to Constitute a Municipal Hospital.

PLANS OF DISTRICT COMMISSIONERS

The Contemplated Structures to Cost Several Million.

SITE ALREADY SELECTED

The District Commissioners have completed and will issue tomorrow the new program of competition for plans for the municipal hospital which will eventually stand at the head of 13th street, above Richmond street and between Arkansas and Iowa avenues. The institution, as planned by the local authorities, will be of most modern type, and when the group of contemplated buildings is complete will have cost several millions of dollars. Congress has already provided for a site, which has been purchased, and has further appropriated the sum of \$5,000 for carrying on the competition for plans.

A program was issued several months ago by the Commissioners, but was objected to on many grounds by the members of the American Institute of Architects. After a public hearing on the subject the Commissioners adopted the suggestion made by the sioners adopted the suggestion made by the architects and secured the services of Mr. Edmund M. Wheelwright of Boston as professional adviser. Mr. Wheelwright is regarded as an eminent authority on hospital structures, and it is really he who has drawn up the program for the preliminary competition, and who will later draw up the program for the final competition and who program for the final competition, and who will advise the Commissioners in the awards in both competitions.

Selection of Architect. The Commissioners specify that all com-

petition sketches for the hospital must be in their hands by noon of February 8 next. The competition is primarily instituted to select an architect for this hospital, and t will be conducted as follows: Three architects will be chosen, through

a preliminary unpaid competition, as the competitors in a final paid competition. The author of the design adjudged to be the best in this final competition shall be appointed the architect of the buildings, under the conditions hereinafter provided. The two other competitors in the final competition shall be provided. tion shall be paid \$1,000 each; and if the Commissioners wish to make use of any feature peculiar to either of the designs of said other competitors, they reserve the right to purchase such sketches upon pay-ment to the author thereof the sum of \$1,000, the sketches to become the property of the District of Columbia. In the choice of the three architects for the final competition the Commissioners will consider the professional standing and ability of the

competitors.

The appointment of the architect of the municipal hospital building is dependent upon the action of Congress in the passage of the necessary appropriation. When this appropriation is passed the author of the design adjudged to be the best in the final design adjudged to be the best in the final competition shall be duly appointed the architect of said building, and he shall serve in this capacity throughout the time required for the construction of all buildings built under the original appropriation and as the architect of all additional buildings for said hospital which shall be built under appropriations made for this purpose by Congress for ten years from the date of the first appropriation for said buildings. Said architect shall be employed to give full services upon all said buildings, and he shall be compensated for his services in accordance with the schedule of charges approved by the American Insti-tute of Architects.

The Group of Buildings.

sist of the following buildings: General Hospital-Administration building, domestic service building, power-house, laundry and machine shop, clinical and pathological buildings, chapel, superintendent's house, nurses' home, four reception ward buildings, nine ward buildings on north side of administration building, five ward buildings on south side of administra-

tion building, connecting corridors, ambulance stable. Tuberculosis Hospital-Two large ward buildings, one small ward building, connecting corridors.

Contagious Hospital - Administration building, domestic building, three ward buildings, nurses' home. The Specifications.

Detailing the character of the several

structures, the program says: "The reception ward buildings should be conveniently adjacent to the administration building, and shall be two stories in height. It should be noted that the domestic service building will be sixty feet in height from grade to top of cornice; that the power house will be fifty feet in height from grade to top of cornice, and be placed adjacent to 13th street, which is to be carried through the hospital grounds; that autopsy amphitheater and morgue, as later that the nurses' home is to provide for the nurses for the tuberculosis depart-

that it is to be four stories in height. The two large tuberculosis ward buildings, three stories high, are to be grouped separately from the single tuberculosis ward building, two stories high. The length of all the tuberculosis ward build-ings should run east and west. As ample area as other conditions may admit shall be provided about these buildings.

The several buildings for the Contagious Hospital should be grouped with regard to buildings, for avoidance of contagion, and to have separate approach to the administration building from a thoroughfare.

Surgical Operating Theater.

The clinical and pathological buildings, one first floor, to contain: Surgical operating theater, to give about 170 students seats; surgeons' room, 360 square feet, with wash, toilet and shower bath rooms adjoining. There are to be eighteen clothes lockers in wash room. Three operating rooms, 960 square feet each; one operating room, 500 square feet, with west and north light; four etherizing rooms; rooms for in-struments, instrument washing, preparation of bandages and sterilizing, conveniently adjoining the operating theater; recovery rooms for both sexes, with tollet rooms, each 675 square feet; nurses' room, with toilet, 270 square feet; house officers' room aboratory for surgical section, 884 square feet; X-ray room, adjoining above; recov-ery room for surgical patients, 870 square feet, with four examination rooms in cor nection therewith, 384 square feet each; medical amphitheater, to seat about 200 students, the space to north under the seats to be utilized for clinical and pathoogical laboratories, and additional space for these purposes to give a total of 3,000 square feet for laboratory purposes; four waiting rooms for patients, 250 square feet, each conveniently accessible to the medical amphitheater.

In a second story above the medical amphitheater, etc., shall be placed the autopsy amphitheater, to seat from 75 to 100 students. Adjoining this amphitheater is to be a morgue providing for accommo-dation of twelve bodies in refrigerating boxes, and private autopsy rooms.

Conveniently located in regard to the autopsy department is to be a chapel, It is left to the competitor's judgment whether the requirements for the clinical and pathological buildings shall be met in separate structures or in a single group. Ward Buildings.

The ward buildings for general hospital

are to be two stories in height, with basement floor not more than four feet below grade, clear height in basement of 10 feet, clear height of each story not less than 14 feet; the allowance of cubic air space to be not less than 1,500 cubic feet per bed. There shall be on each floor of each ward

building one ward of 20 beds; one isolation ward; one convalescents' dining room of 190 square feet area; serving room, with food lift; duty room; tollet rooms, including accommodations for nurses; linen

is to be designed to meet the needs of a hospital of about 900 beds, exclusive of the contagious department, for which a sep-arate administration building is to be pro-

On the first floor are a waiting room for the public; the general office, with connect-ed office and file room and vault; private office for the superintendent, with adjoining waiting room; office for superintendent of nurses, telephone exchange room, coat THE PRELIMINARY STEPS TAKEN

of nurses, telephone exchange room, coat room for visitors, waiting room for the staff, with toilet room adjoining; a pharmacy, with drug store room adjoining, and requisite toilet rooms.

On the second floor: House officers' dining room, with serving room, library, reading room and lounging room for the house officers.

On the third floor: Single sleeping rooms and toilet rooms for thirty house officers.

An elevator, primarily for patients, is to be provided.

Connecting Corridors, General Hospi-

The administration building is to be connected with all ward buildings of the general hospital with covered way two stories in height and designed to afford facilities for the treatment of patients in the open air. The food service and the piping for domestic engineering is to be through the basement of these and of other, but uncovered, corridors. Such covered corri-dor connection is to be arranged to serve the nurses' home of general hospital, the tuberculosis hospital and the contagious hospital. Thirteenth street can be crossed by such a corridor at the point marked "new grade 153" on the site plan. At other points 13th street can be crossed by bridges only, and such bridges are to be provided where it appears desirable to facilitate communication between the several hospital

Solely on Merit. That the preliminary competition is to be judged solely on merit is shown by the fol-

lowing precautions: In each package is to be inclosed a sealed letter, giving the author's name and address, inclosed in a plain, opaque, wnite envelope, addressed in typewriting "To the Commissioners of the District of Colum-

There shall be no distinguishing name, motto, device or mark on the package, on any drawing or on the letter submitted in this competition.

Any violation of any of the above requirements shall debar consideration of any sketches submitted in this competition.

All communications to the Commissioners concerning the requirements of this competition shall be in writing, and the answer to such communications will be sent to all competitors. No communication received after 3 p.m. of January 8, 1902, will be answered.

OF LOCAL INTEREST

STATEMENT OF DISTRICT FINANCES . BY SECRETARY GAGE.

Classic Architecture for Public Buildings-Need for a Hall of Records Shown.

In his annual report the Secretary of the Treasury thus refers to the finances of the District of Columbia: The net expenditures on account of the District of Columbia for the fiscal year 1901

were \$8,748,323.04. The net revenues deposited in the treasury on this account for the same period were \$3,986,176.19. Under the operations of the sinking funds the net reduction of the bonded debt during the year was \$22,950, and of the annual interest charge \$953.42. Since the close of the fiscal year bonds amounting to \$12,250

stock bonds maturing October 1, 1901, \$306,-000 have been redeemed. On have been redeemed.

The total amount of the bonded debt at the close of the fiscal year was \$15,068,350. Of this sum \$14,201,650 consists of 3.65 per cent bonds. These bonds command a premium in the market of 25 per cent, and at this figure would only net to the sinking fund about 2.25 per cent, while the law contemplates an increase to the sinking fund

have been purchased, and of \$319,000 water

The accumulations of interest on the of the old funded debt held for account of the sinking fund for the water stock bonds will hereafter pay the interest on the water bonds outstanding, and no ap-

propriation will be required on this account. Public Buildings. He says that during the last year twenty-

four new buildings have been contracted for many of which are now nearing completion-the largest volume of work ever performed in any one year. He says the classic style of architecture has been adopted so far as practicable, so that all public buildings will have a distinctive character.

In regard to a hall of records he says: Time but serves to emphasize the necessity for a hall of records, which is now crease of departmental business during the last few years. There is no longer any room in the Treasury Department, or buildings rented by it, for additional files. There is a serious condition of congestion both as to current and uncurrent docu-ments. Valuable papers are in some instances stored in the corridors, and the into quarters wholly insufficient for the transaction of public business. Overcrowding in dimly lighted and poorly ventilated cannot fail to affect injuriously the health of those who are subjected to such conditions. Various remedies have been proposed for meeting the demands for more room in this department. The subject is necessary details in this report, but I will on a later occasion submit a special com-munication which will exhibit the great increase of business throughout the of the Treasury Department, and demonstrate the necessity for enlarged quarters.

Bureau of Standards Buildings.

He refers to the new bureau of standards and its organization. Of the proposed buildings and their site, he says: The site selected for the buildings con-

and the relations of agents.

Mr. Jesse L. Heiskell, whom Mr. Warner referred to before leaving as having really suggested this meeting, advanced the idea sists of nearly eight acres in the northwest section of the District of Columbia, near Connecticut avenue and the three-mile circle. It has an elevation of 350 feet and is one of the most desirable building sites in the District of Columbia.

Plans are being prepared for a physical laboratory, which will be equipped with apparatus and conveniences for carrying investigations, and for testing standards and measuring instruments of all kinds. Plans are also being prepared for a somewhat smaller building, to be known as a mechanical laboratory, which will contain the power and general electrical machinery, the instrument shop, refrigerating plant, storage batteries, dynamos for experimental purposes, and laboratories for electrical measurements requiring heavy currents.

The construction of the buildings will be pushed as rapidly as possible, and it is expected that the smaller building will be ready for occupancy by July 1, 1902, and the larger building by January 1, 1903. In the meantime additional quarters have been required in the building occupand by the for secured in the building occupied by the for-mer office of standard weights and meas-ures, with a view to the organization of the bureau and the immediate development of the more needed extensions of the work

Question of Assessments.

F. P. Nash recently wrote to the District Commissioners protesting against an assessment against property owned by him in the line of Sherman avenue. Mr. Nash said he had sold a large portion of the land two years ago, and yet the entire aswas levied against him. The matter war referred to the attorney for the District, Mr. A. B. Duvall, for an opinion as to what relief could be afforded Mr. Nash. The attorney has replied to the Commissioners, say-

from postponements on account of weather would be done away with, and, in addition, the market, he thought, would be better. the extension of Sherman avenue were commenced Mr. Nash was the owner of the whole of two lots, and that afterward, and whole of two lots, and that afterward, and during the proceedings he conveyed a portion thereof to another party. No one, however, appearing in the proceedings to assert any change of ownership, even after the order nisi confirming the verdict had been duly published and notice of such order served, the matter has proceeded to final confirmation in that form. I am of opinates that the Compulsioners are with the compulsioners are with the compulsioners are with the compulsioners. ing the standing of tenants, so that a list of delinquents can be secured, which would be useful to all who have to do with the 190 square feet area; serving room, with ion that the Commissioners are without authority to apportion said assessment; that the closet; locker closet for patients' clothes.

The administration building is to be located on the axis of Kansas avenue, and renting of houses.

Mr. Thomas G. Hensey expressed himself as being heartly in favor of the proposed association and pointed out the growing importance of the business, owing, in part, to the development of rapid transit facilities

Prominent Operators Propose to Form an Organitation.

Meeting Held, Temporary Officers

Chosen and Subject Discussed.

OBJECTS OF ASSOCIATION

What is regarded as a preliminary step to

the organization in this city of the real estate

brokers was taken last evening at a meet-

ing at the Hotel Barton of men engaged in

that line of business. The meeting was

held in response to a call signed by a number of dealers, which stated that the pur-pose of coming together was for "mutual

conference and the consideration of such

questions as may be presented." Those

signing the call were: B. H. Warner Co.,

A. F. Fox Company, Thos. E. Waggaman,

Wilcox & Heiston, Willard & Reed, W. H.

Saunders & Co., Gasch Bros., Louis D.

Wine & Co., Thos. G. Hensey, W. Clarence

Duvall, Arms & Drury and L. E. Shoe-

maker. Invitations were extended to the

real estate men generally to attend the

meeting, and in response quite a large num-

Mr. B. H. Warner called the meeting to

order, explaining that he assumed the duty because he happened to sit near the front. He said the purpose of bringing the real

estate men together was for conference in regard to the best method of promoting the

interests of their business, and for the in-terchange of ideas. In this way it was be-

lleved, he said, that it could be ascertained whether any considerable proportion of the

brokers desired an organization. He had no plan to propose, he declared, and he was ready to unite with others in any line of

action that would be mutually advanta-

Mr. Warner went on to say that the real estate business has become the most impor-

tant industry of the national capital. During the past thirty years the real estate men have done more to build up the capital, and are doing now more to extend the bounds of the city, and to bring residents here, than any other class of men. In other cities organizations have been dependent on the cities organizations have been dependent.

cities organizations had been formed among real estate men and he believed it would

prove to be beneficial to have an organiza-tion in this city. He suggested that after

a temporary organization is formed a com-mittee might be appointed to report a plan

Temporary Officers Elected.

Mr. Warner then called for nominations

for chairman, and Mr. U. H. Ridenour

nominated Mr. Warner and Mr. Jesse L.

Heiskell second the motion. Mr. War-

ner, however, stated that an engagement

made it necessary for him to leave in a

few moments and he would therefore not be able to serve. Mr. F. H. Smith was thereupon nominated and the motion for his election, seconded by Mr. Thomas G. Hensey, was unanimously adopted. George G. Brown was chosen secretary, and the temporary organization having been thus effected the meeting was ready for business.

In taking the chair Mr. Smith said he ac-

In taking the chair Mr. Smith said he accepted the position only for the purpose of securing a temporary organization. He said he was heartily in favor of this movement among real estate men, and in his opinion such a union would be able to accomplish more in directing the affairs of the community than can any other combination of forces. He then invited suggestions.

operation among real estate dealers, but

he had always been told by different men in the business that it could not be done.

Now, he believed, the time had arrived when it could be done. He favored the

erning the members that the business can

be kept free from demoralizing influences. It had been his experience, and he sup-

posed it was general, that he had been obliged to divide commissions with those who were not licensed brokers. He sug-

gested that a committee be appointed to prepare a plan of organization, to report at a future meeting. He believed that a real estate exchange could be formed here and

was sure that it would prove to be a suc-

Association to Have Wide Scope.

Before leaving the room Mr. Warner

said he would be glad to co-operate with

whatever form of organization the meet-

ing decided upon. An association such as

proposed, he said, could have a wide scope.

There are municipal questions which could

Commissioners would welcome suggestions

on such topics from such a source. One plan had been proposed, he said, which contemplates the formation of a real estate

exchange. Another proposes only an asso-

ciation for the purpose of holding meetings

when subjects of interest could be dis

cussed, while another idea was to provide

a place where daily auction sales of real estate could be held, as is done in other

cities. He favored the suggestion of Mr.

Hill for the appointment of a committee,

fore the meeting the suggestion was put

in the form of a motion, and then discus

Chairman Smith was reminded that some

fifteen years ago an exchange was organ-

ized, and after an existence of about a

year it passed away, owing to lack of in-terest. He spoke of the demoralized con-dition of the business in regard to rates

of forming an organization that would be

ers, and by enforcement of reasonable rules

to attempt to bring about some stability as to rates, both of commission and broker-

age. He favored the inclusion within sucl

a scheme of an auction room, where real estate sales could be held with the result

that the attendance would be better, and

the losses that come from unfavorable weather would be entirely prevented.

Mr. L. E. Shoemaker favored the formation of an organization and indorsed what

had already been said on this subject. He

saw no reason why real estate brokers should not have an association as well as

professional and other men having the same interests. An organization was also favored by Col. R. G. Tyler, who spoke briefly but earnestly.

Regarded as Onerous.

In the opinion of Mr. Edward S. Wescot

the proposed organization could have a

scope that would make it possible not only to care for the interest of the members, but

to look after those of property owners. He

cited an instance of the latter in the sec-

tion of the code which goes into effect after the 1st of January pext. He said the clause which provided for dividing the city into magistrate divisions, under the

jurisdiction of a justice of the peace, and requiring that, cases be tried in the district where the defendant resides, will be onerous on property owners and the agents who represent them. He was in

favor of having the code changed in this particular so to have the hearings in the

districts where the plaintiffs live. When Mr. Charles C. Duncanson was

called on he said he was not a real estate man, but an auctioneer. He favored the idea of an auction exchange, and had ad-

stitution for the past twenty years. It was obvious that by providing that such sales be held under shelter the losses arising

The list is as follows: will-iam Corcoran Hill, chairman; Thomas E. Waggaman, Jesse L. Heiskell, George W. Swartzell, David Moore, Robert G. Ruther-ford, James E. Fitch, E. J. Stellwagen, J.

Concert and Comedy. Arrangements have been made for an entertainment, consisting of concert and comedy, to be given under the auspices of the Washington branch of the Woman's Industrial League, for the benefit of the Woman's National Industrial Exhibit. The entertainment will take place at the Na-itonal Rifles' armory, G street between 9th and 10th streets, this evening, beginning at 8 o'clock. The affair is under the direction of Mr. Wm. H. Conley. After the con-cert closes the floor will be cleared for

A tramp dog bit the little daughter of Mrs. Eestwood, at No. 3301 17th street northwest, last night. Policeman Evans was summoned and the dog was killed, the body being taken to the tenth precinct station and afterwards turned over to the health department.

That the Brussels plan of decorating business houses with artistic signs is to be made a feature of the "model city," which is itself to be a feature of the St. Louis ing all such sales out of doors.

Mr. Wescott suggested that a committee exposition, is an interesting example of the spirit of the times. The world over there be appointed to see the committees in Conis a strong reaction against the commongress and endeavor to have a change made place and the ugly, especially in their supposed necessitated connection with business and industrial life. Naturally it is in foreign towns, in foreign capitals, that the new crusade has gained the most headway and has interested the greatest number of people, as is shown in the painted Detaille's effort to regenerate Paris, but the new

> United States. So far as it manifested itself here it comes from the enthusiastic young men and women trained in the up-to-date mod-ern schools of art and architecture. With an equipment in the matter of technical ability and art knowledge far superior to what passed for school attainments twen artist of today has a fresh and knowing eye, and is not only open to the potential suggestions of clever minds in other lands, stimulus that comes from the best work of the past. The result of this is that our of-fice buildings, our homes, city and subur-ban, and even our factories have a grace as well as an efficiency that is most gratifying future.

spirit is by no means unknown in the

ahead for those interested in civic embel-lishment, and hence it is worth while not-ing all the efforts made abroad, since these are of a distinct value in that they tend to interest a larger number year by year in this most important matter. As Detaille suggests, our streets could easily be redeemed by attractive signs as well as by picturesque fronts, and even one step counts. The "model city" at St. Louis is a capital idea, and that it was originated by a Philadelphian is one reason why we should put ourselves in line with the civic art movements which are stirring the world Took It All.

Alexander W. Goodwin, a member of the

United States Hospital Corps, was in the Police Court today charged with disorderly conduct and destroying public property. A policeman told Judge Kimball that the oldier, while under the influence of liquor, soldier, while under the influence of liquor, called at the Maitby building yesterday.

"He was disorderly and was put out of the building," continued the officer, "and a few minutes later he put his fist through a side window."

"What have you got to say?" inquired the court of Goodwin.

"Your honor, I leave for the Philippines tonight."

will fly the English flag, but the entire capital, nearly \$4,000,000, is furnished by residents of the United States. The steamers will go into the tramping trade at first, but will probably later be the nucleus of a new line to run from ports in the United States to the united kingdom.

"The new shipbuilding plant near the "Soo' canal will be constructed, and at least \$10,000,000 will be involved."

"Have you any money?"
"Six dollars.""Three dollars in each case," said the

ENGLISHMAN GETS \$4,000,000 JOB

A Long Struggle Ahead for Believers Sir Christopher Furness to Build Steamers for Americans. From the New York Herald, today,

Returning to England with signed contracts for the building of twelve freightcarrying steamers of from 6,000 to 12,000 tons' dead weight capacity, the capital, nearly \$4,000,000, to be furnished by Americans, Sir Christopher Furness, M.P., sailed yesterday on the North German Lloyd steamship Kronprinz Wilhelm.

Besides this he has also made arrangements with the Clergue interests at Sault Ste. Marie, Canada, for the erection of an immense shipbuilding plant, to be located at Sainte Samaire, close to the junction of the "Soo" canal and Lake Superior. Here will be erected steel works which will cost approximately \$10,000,000, and the iron and coal fields of Canada will furnish the raw material.

Before he salled yesterday he said to a reporter for the Heraid: "I have found out why the United States manufacturer is crowding the British producer, so that the latter has to put his back against the wall in order to hold his own.

"Were I a young man I would surely set-tle in the United States to make my for-tune. I have seen here the railroad loco-motives hauling twice the load that is hauled on the English roads, with half the expense. Everything else I have seen done on the same economic scale. How can our country compets unless redical become our country compete unless radical changes

profit by the greatness of the United States I have chosen to locate my next project

"The great drawback to the navigation "The great drawback to the navigation of the St. Lawrence river is the ice, but this will be overcome by immense ice-crushing steamers which will be constructed. "Few of the class that should be thor-oughly acquainted with the greatness of the United States, in my country, are

aware of your immense resources or the plants for the use of them.

"I have seen all of the great steel plants, in which I am vitally interested, as well as the several shipbuilding concerns of the United Statess
"Although the Atlantic coast at present

"Although the Atlantic coast at present is the great marine line of prosperity for ships and shipbuilders, yet I believe that the future lies with the Pacific coast, whose ports will surely be developed in immense centers for the distribution of the products of the United States." In relation to the report that he had re-ceived contracts for the building of a fleet

of freight-carrying steamers, he said:

"Since I came here I have agreed to build twelve steamers aggregating about 96,000 tons dead-weight carrying capacity. They will fly the English flag, but the entire

A meeting of anarchists in London to celebrate the fourteenth anniversary of the execution of the Chicago anarchists was prevented by the police.
